KEY POINTS

- I have been an enthusiastic advocate of **Human Centred Design** in product development, business analysis, UX design and agile methodology for most of my IT career.
- I have extensive experience in the **end-to-end process** of ideation, prototyping, user testing, producing wireframes, writing specifications and requirements, coordinating testing, through to product launch. I also have strong experience in post-launch benefits realisation assessments.
- I was the lead analyst in the research and development of UTS's agile development **framework**. This involved creating initial framework documentation, piloting with projects, and analysing feedback to create the final, tested framework.
- I have significant experience **managing teams**, including managing workloads, mentoring practitioners and finding talented new team members. In my experience, the most important element of team leadership is clear, two-way communication regarding the expectations of team members, as exemplified by the 'Objectives and Key Results' (OKR) method.
- I work with technical teams to create processes, interaction designs and functional designs that are **suitable for the technical platform** being used, and which take advantage of their native capabilities.

WORK

Team Lead Business Analyst, University of Technology Sydney

January 2017 – Present

Supervisor of business analyst team in the Technology Projects Office:

- Managing and mentoring team of 8 senior and mid-level Bas
- Overseeing Service Design
- Performance reviews and professional development plans
- Forecasting and allocation of resources

Hands-on business analyst and interaction design work – project scoping, requirements gathering, functional and UX design, testing facilitation, benefits articulation and benefits assessment. Projects included:

- Research Costing & Pricing Module
- Higher Degree Research – Service Design (Human Centred Design process)
- Learning Management System Administration
- Transformation of Collection of Student Data
- UTS Open – online short course store
- Higher Degree Research process automation

Some projects used agile methods and some took a waterfall approach.

Lead Business Analyst / Interaction Designer, Healthdirect Australia

September 2014 – January 2017

These projects included extensive user research and design processes. I carried out and oversaw end-to-end product design processes, including service design, user testing with prototypes, iterative interaction/UX design, and agile development processes.

Manager of online business analytics and design team:

- Mentoring junior and mid-level business analysts
- Leading the formation of Healthdirect's BA product development process
- Leading an agile (Scrum-based) and Design Thinking business analysis approach
- Performance reviews and professional development plans
- Forecasting and allocation of resources

Business analyst, UX and interaction design duties:

- Healthdirect website redesign
- Health Service finder

Overseeing business analysis, UX and interaction design work on:

- Pregnancy, Birth and Baby website
- Mindhealthconnect website

Business Analyst / Interaction Designer, Healthdirect Australia

Apr 2013 – August 2014

Agile business analyst, interaction design and some project management duties for Healthdirect's:

- Symptom Checker - www.healthdirect.org.au/symptom-checker
- App - www.healthdirect.gov.au/health-app

Also business analyst and interaction design duties on:

- Video call reporting
- “Website Harvester” content collation system

Business Consultant, Jacobs Australia

Jan 2012 – Mar 2013

Jacobs Australia is part of Jacobs Engineering Group, a multi-national engineering firm. Most Jacobs projects revolve around delivery of Microsoft SharePoint and related technologies.

As Business Consultant my role was to discover and analyse requirements, and design and specify a solution from a functional and business perspective. This included specifications of intranet site navigation, document management, metadata, search functions, workflow, social business, content migration, governance, training, change management and other aspects of information management.

Projects included:

- APA Group Information Management Roadmap
- Dept of Sustainability Information Management Roadmap, Governance and Training plan
- PwC intranet (“PWC Online”) requirements, training strategy and training materials

Senior Business Analyst, News Digital Media, Sydney (Contractor)

Mar 2011 – Dec 2011

NDM is the digital arm of News Ltd and was carrying out a range of large scale IT projects for News Ltd publications including The Australian, Daily Telegraph, Courier Mail and others. These projects included the integration of social media, enhanced website interactivity and mobile applications.

Duties:

- Requirements gathering interviews and workshops
- Specifications and interaction design on social media integration
- Reporting specifications

Senior Producer & Interim Head of Project Services Team

The Group, London, (now Addison Group)

May 2010 – Jan 2011

The Group (now Addison Group) is an integrated communications agency with FTSE 100 corporate clients such as Aviva, British Land, Centrica, InterContinental Hotels Group, Kingfisher Group, SAB Miller and Sainsbury's.

Activities:

- Interim head of the team for two months while a new Head of Project Services was recruited
- Project management: project planning, tracking and managing development process and progress
- Project costing, client liaison, stakeholder management and reporting

Lead producer on:

- British Land corporate site
- Centrica Onboarding site
- Gaia Insight web analytics

Senior User Experience Architect, The Group, London (now Addison Group)

February 2007 – April 2010

Duties:

- Requirements gathering, interviews, workshops, user research
- Functional specifications including wireframes, user journeys, use cases
- Usability consultation, auditing and testing
- Hiring, mentoring and managing a junior User Experience Architect
- Project management for development of Conductor, The Group's in-house built CMS

I carried out user experience analysis and design for various projects including:

- Aviva Ocean Racing
- Aviva brand identity
- British Gas careers
- Centrica data centre
- Centrica intranet
- Centrica corporate site
- Gaia Insight web analytics
- IHG Innovation Hotel
- IHG corporate site
- Kingfisher corporate site
- Report tools for all annual reports
- Provident Financial corporate site
- SABMiller corporate site
- J-Sainsbury corporate site
- The Group website rebuild
- The Group CMS/Extranet manual

I also carried out analysis, interaction design, project management and testing duties for The Group's in-house built CMS including the Blog and Blog Administration modules, Digital Assets Management, Email Services module, Subscriber Management module, SMS Services module, and an overall system revamp.

Senior Usability Consultant, Usability by Design, London

January 2005 – February 2007

Usability by Design was a usability consultancy company with a range of corporate and public sector clients. (The company ceased trading in 2008.)

Duties:

- Preparing and facilitating focus groups and requirements gathering workshops
- Information architecture studies, including card sort activities
- Usability testing – scripting, logging, report-writing, project management
- Usability evaluations
- Interaction design, including wireframes, user journeys, personas, functional specifications
- Usability training

In this role, I provided usability testing and auditing consultancy services for The National Archives, LearnDirect, The Home Office, John Lewis Partnership, Waitrose, the Environment Agency, Raymarine, Powergen, Leicester City Council and Reed Business Information.

Some of the larger projects I worked on were IA and user journeys for The National Archives records browse and search, and interaction design including all interfaces and icons for the Raymarine ST70 Multifunction Color Instrument.

Business Analytics Manager, Unique World Pty Ltd, Sydney

January 2004 – July 2004

Unique World was a software development and e-marketing company based in Sydney, which mainly deals with internet systems and applications.

Duties:

- Reviewing functional specifications, scoping documents, test plans and other documents
- Managing a team of four business analysts including
 - Mentoring and training team members
 - Allocating resources to projects
 - Interviewing and hiring new team members
 - Carrying out performance reviews
- Some senior business analyst duties
- Reporting to Professional Services Manager, CEO and the board on Business Analytics department activities

Senior Business Analyst / UX Architect, Unique World Pty Ltd, Sydney

February 2002 – January 2004

Business Analyst / Interaction Designer

June 2001 – February 2002

Duties:

- Liaising closely with clients to understand their organisation
- Carrying out workshops and interviews for requirements gathering
- Producing:
 - Project scoping documents
 - Functional specifications (including interaction design, wireframes, site maps, full functionality description)
 - Test plans
- Liaising with Unique World and client technical teams

My work at Unique World included leading requirements workshops and producing functional specifications, including wireframes and interaction design, for various projects including:

- **Australian Council of State Emergency Services** e-training website and content management system
- **Blake Dawson Waldron** “SALT” V.3 online legal training delivery and compliance tracking system
- **E-lect** commercial polling management system
- **Epson** “SmartStore” online store
- **Epson** “Surveys” website survey and data management system
- **Flexirent** “Flexichips Rewards” online rebate and spiv sales incentive system
- **Flexirent** “After tax calculator”
- **Flexirent** “Trade up calculator”
- **Kellogg’s Australia** website and content management system (CMS)
- **Kimberly-Clark Australia** member management system
- **Maxxium Australia** Microsoft SharePoint implementation
- **Microsoft** “Salsa” Automatic marketing lead distribution system
- **NSW Dept of Information Technology and Management** Microsoft CMS implementation
- **NSW Dept of State and Regional Development** Australian Technology Showcase website, kiosk and CD
- **Smart Internet Technology Co-operative Research Centre** website and CMS
- **Ticketek** “Australian Open” online ticketing system
- **Wattyl Australia** website and CMS
- **WorkCover NSW** website and CMS

Website Editor & Content Manager, Smartbuy Pty Ltd, Sydney

October 1999 – June 2001

Smartbuy was initially a pure-play online retailer but later changed its business model and approached traditional retailers to run their e-commerce facilities. Smartbuy ran www.tandy.com.au from mid-2000. In 2001, Smartbuy merged with its technology business partner, Unique World.

At Smartbuy, I was responsible for content and product information for Tandy.com.au. In 2001, Tandy was rated Australia’s 5th best online retail site by the reputable web reviewer Global Reviews. The site scored 4 out of 5 for product and content, and Global Reviews wrote: “[A] very high ranking for Product & Content and strong performances in the Fulfillment and Customer Service categories make them one of this country’s leading e-tailers.”

Duties:

- Writing all copy and text for the website
- Gathering and formatting product information and images
- Managing team of three product information entry staff
- Assisting in the design of the website
- Writing website functional specifications
- Writing press releases

Marketing Communications, Dataflow Computer Services, Sydney

October 1995 – October 1999

Dataflow Computer Services was a software distributor whose customers included large retailers such as Harvey Norman, David Jones and Grace Bros.

Duties:

- Responsible for internal and external communications for the company
- Produced the annual print catalogue
- Produced weekly information pack: collating information on new products and presenting it in pack form for sales reps, marketing, customer service and managers
- Surveying options and driving any changes in communications between Dataflow and its customers

Psychobiology Research Assistant, University of Western Australia, Perth

1991 – 1994

I worked in the Psychobiology Laboratory at UWA.

Duties:

- Helping to design experiments
- Recruiting and running subjects on experiments.
- Statistical analysis of results.
- Co-writing academic papers.

Papers published:

- Hammond, Thompson & Campbell. *Judgments of moving and intending to move in a timed-response task*. Psychological Research (1993) Vol.55.
- Hammond, Thompson, Driscoll & Proffit. *Excitability of the human blink reflex*. Psychobiology (1995)
